### **DETAILED ACTION**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not apparent how the film (which is supposedly cured and from which the porogen is removed) can still comprise and uncured composition of claim 1.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-7, 10-13 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 6,623,711 to Lyu et al., (hereinafter "Lyu") in combination with US Patent 5,700,899 to Akoi et al., (hereinafter "Akoi").

The rejection stands as per reasons of record.

### ***Response to Arguments***

Applicant's arguments filed 9-24-2008 have been fully considered but they are not persuasive. The only arguments presented by the applicants is that the examiner failed to point out (and the applicants can not find) where the Akoi reference discloses photoacid generators, especially those represented by the formula 5-7.

In response the examiner wishes to bring the applicants' attention to the middle of page 4 of the Office action issued by the Office on 6-13-2008, where she specifically pointed out columns and lines where the Akoi reference discloses the claimed photoacid generators, i.e., column 5, lines 37-63). It appears that the applicants were not able to read the 25+ lines referenced by the examiner to appreciate that the cited English language reference discloses photo-acid generators identical to the claimed acids. For applicants convenience, the attention is drawn, specifically to formula  $(R^4)_3S^+X^-$  in column 5, line 45, where X is defined, among other suitable groups, as  $CF_3SO_3^-$  (line 48), and  $(R^4)$  is defined as aryl group. The attention is further drawn to description of photobase generators followed the description of photoacid generators.

Since, as discussed in the previous office action, the disclosures of the cited references do, in fact, disclosed what the office action said it discloses, the rejection is maintained and is made final.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1796

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
